Projects

- **Seeded** (<https://seed-ed.herokuapp.com/>)
 - Full CRUD social-media application for plant enthusiasts that utilizes a Node and Express backend with HandlebarsJS frontend.
 - Implemented route structure with Express and built front UI with Handlebars template engine.
- **What's That Anime?** (<https://andrewtranmsw.github.io/whatsThatAnime/>)
 - Produced an application that utilizes three different APIs to provide Anime information upon image upload for users. Users are also provided with relevant GIFs of the Anime along with suggestions for similar shows.
 - Implementation of fetching data from the Jikan and Giphy APIs as well as design with Foundation framework for UI design.
- **Ftchr: Pet playdates and meet-ups** (<https://ftchrapp.herokuapp.com/>)
 - CRUD social media application for pets and users to find other pets for playdates utilizing the Mapbox and Leaflet APIs to search their area via geolocation and built with a Node and Express backend.
 - Implementation of the Mapbox API and Leaflet API to show user information on map and UI based on location. Built API and backend routes with Express routing. Execution of React for application structure and design.

Work Experience

- **Clinical Social Worker**
Valley Medical Center and Swedish Medical Centers July 2018 – September 2021
 - Direct clinical practice with acute-care patients in the medical-surgical, COVID overflow, NICU, Peds, and Renal Respiratory units.
 - Psychosocial assessments for ongoing patient care from admission to discharge.
 - Collaboration with interdisciplinary healthcare providers for the planning of safe and successful discharges of patients.
 - Coordination with King County for the detainment of involuntary psychiatric patients and the liaison for voluntary patients experiencing acute mental health crisis.
 - Coordination of care with community stakeholders such as skilled nursing facilities, home health agencies, and child-protective services.
 - EPIC health system super-user for the social work department at Swedish Edmonds.
